

September 3, 2015

Dear Members of the Living Rosary,

Anthony Foster Oduro, our faithful and first representative in the foreign missions, is flat on his back with a severe condition of the neck and spine. Anthony has labored tirelessly for over 20 years with us. We ask your prayers for his health and recovery so that he may return to his post as leader of our National Center in Ghana, Africa.

Marcus has worked with Anthony faithfully for many years. Recently, he was struck down by an unidentified vehicle and his leg was badly broken. This happened after he closed the House of Saint Philomena for the night.

By God's Grace, the work at the Center is in progress as two young ladies, who are computer literates, are now busy on the job. They have good knowledge of the work and have agreed to help us in our hour of need. They will take charge of the enrollment, packing the parcels to be sent out to the leaders and answering mails at the office.

Anthony shares from his hospital bed: "Oh, how I wish I could be back to start my normal duties! Thy will be done, O my God! I can say that our office is the busiest one on the Basilica premises and we always have people available to teach those who come for instruction, but we are the poorest office in terms of financial support."

Thank you and may God reward you a million times for your marvelous generosity!
